

SEGMENT newsletter: Medviso at EuroCMR

MEDVISO AT EUROCMR 2-4 MAY 2019

Medviso will attend EuroCMR joint Scientific Sessions in Venice 2 May - 4 May 2019. You will find us as exhibitor in booth D4 and as sponsor of the Special Course on 3D printing at EuroCMR 2019. We will be happy to meet you there to discuss any research questions you might have or show you our clinical software solutions for CMR, CT and 3D printing.

OUR SOFTWARE SOLUTIONS

Medviso provides a complete software solution for your clinical and research needs.

Segment: Comprehensive image analysis software freely available for research.

<http://medviso.com/segment/>

Strain analysis module: Cardiac strain analysis module with high reproducibility.

<http://medviso.com/strain/>

Segment CMR: Clinical software for quantitative CMR analysis. <http://medviso.com/cmr/>

Segment 3DPrint: Complete and easy-to-use software solution for 3D printing.

<http://medviso.com/segment-3dprint/>

Segment CT: Clinical software for quantitative CT analysis. <http://medviso.com/ct/>

SEGMENT NEWSLETTER

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes, provided that you properly refer to the software according to instructions on <http://medviso.com/research/how-to-refer/>

Best regards

Helen Fransson, CEO Medviso AB
