

## SEGMENT CMR IN SIEMENS OPENAPPS

We are happy to announce partnership with Siemens Healthcare to provide our clinical software solution Segment CMR including the Strain module through Siemens Healthineers Digital Marketplace. In addition to the stand-alone version provided directly from us, this means that you can find Segment CMR as an App to Siemens platform Syngo.via. More information is found at Siemens Healthineers Digital Marketplace as linked below:

<https://store.teamplay.siemens.com/app/detail/OpenApps-SegmentCMR?country=gb&language=en> \*

\* Please note, so far only available in Syngo.via solutions in European countries

## SEGMENT STRAIN MODULE

The strain analysis module is a comprehensive package for strain analysis including both feature tracking and tagging analysis in one package. Other features are LV/RV strain analysis, long and short axis strain analysis, batch script analysis, dyssynchrony, and strain rate analysis. The module is integrated into Segment for a research solution and Segment CMR for a clinical solution, which is both CE-marked and FDA certified. More information can be found in the Segment Strain brochure:

## SEGMENT NEWSLETTER

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes, provided that you properly refer to the software according to instructions on <http://medviso.com/research/how-to-refer/>

**Best regards**

Helen Fransson, CEO Medviso AB
