

MEET US AT ESC CONGRESS 25-28 AUGUST

We will attend the ESC congress 25-29 August in Munich - Germany. Together with the 3D printer company Stratasys we will present our complete 3D printing and 3D modelling solution.

If you are attending the ESC congress, come by Stratasys booth G290, Hall 3 in Digital Health section and see our 3D printing software solution live.

3D PRINTING SOFTWARE SOLUTION

Medviso launched this summer a new software solution for 3D printing and 3D modelling. The software provides you with a complete clinical solution from importing DICOM images, to 3D segmentation and generation of high quality STL-files ready for 3D-printing or modelling. The 3D segmentation is applicable on all organs and in both MRI and CT images.

More information about our 3D printing software solution is found at our <http://medviso.com/3dsegmentation/>

Take a first look at our 3D printing software solution with our <http://medviso.com/tutorial-videos/>

SEGMENT NEWSLETTER

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes, provided that you properly refer to the software according to instructions on <http://medviso.com/research/how-to-refer/>

Best regards

Helen Fransson, CEO Medviso AB
