

MEDVISO AT CMR2018

Medviso will attend CMR2018 joint Scientific Sessions in Barcelona 31 January- 3 February 2018. You will find us as exhibitor in booth B4 and at the Face off session on Friday 18:05. We are happy to discuss any research question you might have. If you are interested we can also present our Strain analysis module and our clinical MR analysis software Segment CMR.

SEGMENT SOURCE VERSION ON GITHUB

Segment is released in two formats; the Stand-alone format and the Source code format. Both formats are freely available for research purposes. The stand-alone format is the default format for general usage and can be downloaded from Medviso website <http://medviso.com/download2/>. The Source code format is for you who want to write own plug-ins to Segment in Matlab. The source code format of Segment is now to be found on GitHub (<https://github.com/Cardiac-MR-Group-Lund/segment-open>), and we are looking forward to an active user community.

STRAIN ANALYSIS MODULE

Medviso provide a complete Strain analysis module for both clinical use and research purposes. The module enables Strain analysis from both MR Tagging images and MR Cine images, and analyzes both short-axis and long-axis image stacks and both LV and RV strain. You can read more about the Strain module on our website (<http://medviso.com/products/strain/>). If you are interested in testing the module please come by our booth at CMR2018 or send an email to sales@medviso.com. The Strain module is provided both for research and clinical use for a one-time cost of 4.000€ for a Single license, or 7.000€ for a Site license.

SEGMENT CMR

Segment CMR is a complete image analysis solution for clinical CMR. It includes all features necessary for clinical CMR, such as functional analysis, valve analysis, viability analysis and advanced reporting. Segment CMR is designed to be simple to use and with a daily clinical workflow in mind. Segment CMR bears the CE marking of conformity and is FDA 510(k) approved. You can read more about Segment CMR on our website (<http://medviso.com/products/cmr/>).

SEGMENT NEWSLETTER

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes, provided that you properly refer to the software according to instructions on <http://medviso.com/research/how-to-refer/>

Best regards

Helen Fransson, CEO Medviso AB
