

Medviso 3D printing software news

Learn from experts about 3D printing in medicine and how to implement 3D printing at your site at Medviso's 3D printing hands-on course. The course will be in April 23-24, 2019 in Lund, Sweden. Also check out the latest version of our Segment 3DPrint software.

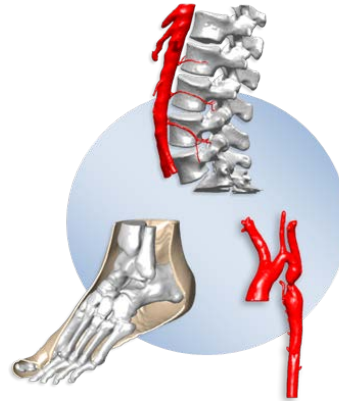

3D printing hands-on course April 23-24 2019

Medviso will together with clinical experts host a 2-day hands-on 3D printing course. The course will be in English and are intended for medically trained professionals who want to learn more about 3D printing and 3D segmentation. Each participant will work on individual workstations to get maximum hands-on experience. The price for the 2-day course is 3200 SEK + VAT(25%) and includes 2 lunches and course dinner.

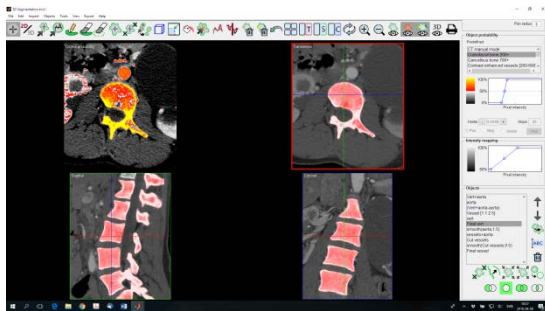

Register for the course by fill in the form on [course registration](#)

Latest day of registration is March 10, 2019.

More information and preliminary schedule for the course is found on [course invitation](#)

3D printing software solution

If you have not tried the latest version of the 3D printing software, we invite you to test it. There are now features for label segmented object for traceability purposes when they are printed, and you also find features for adding support structures to the segmented object in an easy manner. Go in and check the Segment 3DPrint [brochure](#) for the complete feature list. You also find more information about the software at our website [Segment 3DPrint](#).

To request an evaluation license or get in touch with us, fill out [our contact form](#)

Best regards
