

FEATURE TRACKING AND STRAIN TAGGING ANALYSIS

A complete Strain analysis module is now available in Segment. The module enables Strain analysis from both MR Tagging images and from MR Cine image, and analyzes both short-axis and long-axis image stacks. The module is an additional module to Segment, and provided for both clinical usage as well as research. More information about the module can be found at our website <http://medviso.com/products/strain-tagging/>.

EVALUATION LICENSE AND QUOTE

Please contact sales@medviso.com if you are interested in an evaluation license and a quote for the Strain analysis module.

SEGMENT NEWSLETTER

You are receiving this newsletter since you are registered as a user of the medical image analysis software Segment. The software Segment is brought to you by Medviso AB in close collaboration with Lund Cardiac MR Group, Lund University, Sweden and Region of Scania, Skåne University Hospital. Segment is freely available for research purposes, provided that you properly refer to the software according to instructions on <http://medviso.com/research/how-to-refer/>.

If you do not want to receive further newsletters, please see below for how to unsubscribe.

Best regards

Helen Fransson, CEO Medviso AB
