

Meet us at ESC congress 25-28 August

We will attend the ESC congress 25-29 August in Munich - Germany. Together with the 3D printer company Stratasys we will present our complete 3D printing solution for hospitals.

If you are attending the ESC congress come by Stratasys booth G290, Hall 3 in Digital Health section and see our 3D printing software solution live.

3D printing software solution

Medviso launched this summer a new software solution for 3D printing segmentation. The software provides you with a complete clinical solution for 3D printing segmentation, from importing DICOM images, to 3D segmentation and generation of STL-files ready for 3D-printing. The 3D segmentation is applicable on all organs and in both MRI and CT images.

More information about our 3D printing software solution is found at our [3D printing software solution webpage](#).

Take a first look at our 3D printing software solution with our [Software introduction video](#).
